

SHRE RAAM P J

shreraam007@gmail.com | +91 96554 41000 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Third-year Computer Science student passionate about building real-world software systems across AI, full-stack development, automation, and data engineering. Experienced in developing scalable projects using React, Flask, Python, YOLOv8, REST APIs, and machine learning workflows. Built multiple production-style applications including AI-powered analytics pipelines, real-time crowd monitoring systems, trading automation tools, and secure compression systems. Active hackathon participant with national-level recognitions, internship experience, and strong interest in solving practical problems through technology.

EXPERIENCE

Software Developer Intern | SR NEXT (Remote) [\[github\]](#)

Apr 2026 – May 2026

- Built an end-to-end Instagram influencer analytics pipeline processing 2,000+ profiles using feature engineering and ML ranking models.
- Reduced manual data cleaning efforts by ~40% via semi-automated collection workflows using Python, Pandas, and Google Sheets.
- Shipped a user-facing analytical dashboard deployed live via Streamlit.

Web Development Intern | InAmigos Foundation (Remote) [\[live site 1\]](#) [\[github link -1\]](#) [\[Live Site-2\]](#) [\[Github -2\]](#)

May 2026 – Present

- Developed and deployed a fully responsive, mobile-first NGO awareness website covering 6 key community initiatives using HTML, CSS, JavaScript, React, and Vite.
- Performed deep UI/UX analysis identifying crucial navigation, social linking, and responsiveness optimizations.
- Designed AI-assisted frontend feature mockups highlighting donation systems, volunteer forms, campaign showcases, and impact statistics.
- Managed continuous integration and cloud version control workflows using GitHub Pages and Vercel.

PROJECTS

Crowd Analyzer – ESP32-CAM, Flask, YOLOv8, Data Analysis

[\[Demo Video\]](#) [\[GitHub\]](#)

Real-time crowd density detector streaming video frames from an ESP32-CAM to a Flask/YOLOv8 AI backend for live person detection. Generated dynamic heatmaps and configured automated threshold-based emergency alerts. Project selected by Intel IoT Club for the SmartCity X Hackathon.

Duplicate File Finder – C++, Qt, Windows

[\[GitHub\]](#)

Duplicate File Finder is a desktop application built using C++ and Qt that scans directories recursively to detect duplicate files using hash-based comparison. The application helps optimize storage by identifying and managing redundant files through a clean native UI with in-app deletion support and bundled dependencies for easy execution.

Binance Futures Trading Bot – Python, REST API, CLI, Security

[\[github\]](#)

Formulated a zero-dependency automated trading infrastructure executing MARKET, LIMIT, STOP, and TWAP order books directly via the Binance REST API with SHA256 HMAC auth, rotating logs, and a modular CLI interface.

AlphaMap Secure Pipeline – Python, AES-256-GCM, Cryptography

[\[GitHub\]](#)

Created a highly optimized low-level data compression pipeline leveraging custom dictionary encoding and custom bit-packing schemas. Hardened internal transmission data payloads via robust AES-256-GCM cryptographic encryption with PBKDF2 key derivation and CRC32 integrity checks.

TECHNICAL SKILLS

Languages:	Python, JavaScript, C++, SQL, HTML/CSS
Frameworks:	React.js, Vite, Flask, Qt, Streamlit, Framer Motion
AI / ML:	YOLOv8, Scikit-learn, Pandas, Data Engineering Pipelines, Feature Engineering
Tools & Cloud:	Git, GitHub, Vercel, GitHub Pages, REST APIs, ESP32 Microcontrollers, Excel

ACHIEVEMENTS & CERTIFICATIONS

- Hackathon Finalist:** Crowd Analyzer project selected into the Top 10 for the SmartCity X Hackathon by the Intel IoT Club. [\[Certificate\]](#)
- National Ranker:** Secured Top 15 out of 85 competing teams nationwide at the Anokha Build2Break Hackathon 2026 [\[Certificate\]](#) (Amrita University).
- Statewide Shortlist:** Placed in the Top 55 out of 650 teams across Tamil Nadu at the NIT Trichy x TCS Tata Centre for AI [\[Certificate\]](#) & ML Ideathon.
- IBM Certified:** Earned industry certification for *Getting Started with Artificial Intelligence* (March 2026). [\[Certificate\]](#)

EDUCATION

B.Tech in Computer Science and Engineering | Amrita Vishwa Vidyapeetham, Ettimadai

2024 – 2028
